

Stoneshield Collar Roll

Effortless Fire Protection for Service Penetrations

The Stoneshield Collar Roll is a pre-fabricated, fire-resistant textile seal engineered for seamless integration with the full range of **Stoneshield barrier systems**. Combining both collar and cuff elements in one quick-to-install unit, it delivers reliable fire integrity with minimal onsite labour.

Key Features

- **All-in-One Design**
Pre-fabricated collar + cuff ensures correct installation every time—no separate parts required.
- **Rapid Installation**
Simply wrap and bond using Stoneshield HT Adhesive for a watertight, fire-proof seal.
- **Proven Fire Performance**
Maintains full fire resistance of your Stoneshield barrier for up to **120 minutes**.
- **Versatile Compatibility**
Fits a wide range of pipe, duct, and cable penetrations with zero cutting or tailoring.

How It Works

1. **Position the Collar Roll** around the service penetration.
2. **Apply Stoneshield HT Adhesive** to the substrate and seal edges.
3. **Ensure Tight Seal**—the integrated cuff flames, smoke, and hot gases.
