

## Stoneshield Brush Seal

### Reliable Fire Protection for Service Penetrations

The Stoneshield Brush Seal is a high-performance, fire-resistant textile tape designed specifically for use with the full range of **Stoneshield barrier systems**. Built to manage service penetrations effectively, it helps maintain critical fire integrity where cables, pipes, or other services pass through barriers.

### Key Benefits

- **High Temperature Performance:** Maintains fire resistance for up to **120 minutes** when installed as part of a Stoneshield barrier system.
- **Universal Fit:** A true “**one-size-fits-all**” solution — ideal for wrapping around a wide range of shapes and sizes with minimal material waste.
- **Seamless Integration:** Developed exclusively for use with Stoneshield systems for assured compatibility and performance.
- **Ensures Tight Seal**—the integrated cuff expands under heat to block flames, smoke, and hot gases.
